Instructions:

1. Using the Coluzzle template, mat and knife cut 3 folder files the next largest size. This will take up most of the 8.5" x 11" sheets. Stamp randomly with leaf, wreath and bow stamps in Ranger Weathered Wood distressing ink on both sides of the folder you have created. When the ink is dry, randomly stamp the wreathes with the bow stamp and fired brick distressing ink. Once all the folders are stamped on both sides, fold the folders in half.

2. To make your book, you will put all three folders together matching sides; the middle folder will be glued with the PVA glue to the other two folders on a matching side. This will give you 4 pages in your photo book. Ink the edges of your book with fired brick distressing ink.

3. On each page you will attach your Bazzill mats or your manila journal boxes, alternating for each page.

4. Decorate your pages with the Christmas rub-ons and letter stickers. Apply photos using Scotch double stick tape and include journaling. If you are giving these books as gifts in place of Christmas cards, leave the mats and boxes blank for your recipient's use.
