For Christmas, send out a dual message to loved ones and friends with a card/ornament combo. The ornie becomes a keepsake to treasure year after year. What better way to be remembered by. It will look lovely hanging on the Christmas tree or in a window. Get the kids involved with this delightful angel.

Supplies

Four Emory nail filing boards 4 ½ "long
One faux rhinestone gem (Darice)
One 6" piece of silver ribbon (Offray)
Winter White acrylic paint (Folk Art by Plaid)
One Toothpick
Dark blue cardstock; cut to size 11" x 7" folded to 5½" x 7"
One 5 ¾" by 7 ¼" white envelope
White Glitter (Darice) these are large flakes
Metal ruler
Scissors
6" piece of 22 gauge floral wire
Clear drying glue (Modpodge)

Instructions:

1. Begin by cutting two Emory boards in half vertically. (See picture II).
2. Then cut one of them into four individual pieces 1 ½ "long. Cut the other into 3 pieces 2 ¼ " long, which will leave one piece that you will cut in half for the arms.
2. Cut another Emory board in half horizontally and cut off ½ ". Glue the two pieces on to the remaining Emory board to form the shape of a cross.
3. Spread Modpodge glue over all the pieces and sprinkle with Darice glitter.

4. To assemble the pieces, start with the four pieces for the wings and glue them in place. Take the three long pieces for the dress and glue them on top of the cross form (see picture). Glue the faux rhinestone in place for the head and tie a silver ribbon around the angel snowflake.

5. Cut off one end of the toothpick so it is round and dip it into the folk art winter white paint and make the star symbols on the dark card stock. Use the round end for the dots and the pointed end for the lines around the dots.

6. Cut or punch two small holes in the cardstock the width of the angel snowflake and thread a piece of 22-gauge wire through to secure ornament to the card.

Until next time this is Casey ...
