Supplies:

Scor-Pal Board
Stamps (Hero Arts)
Cardstock (Stampin' Up!)
Metallic Cardstock (unknown)
Stickles Glitter Glue (Ranger)
Ultra Fine Glitter (Prisma)
Adhesive (Xyron)
Noir Ink Pad (Palette)
Crystal Lacquer (Sakura Hobby Craft)
Emory Board (Revlon)
Pop Dots (unknown)
Glue Stick (Stampin' Up!)
Embossing stylus (unknown)

Directions:

1. Take an $8\frac{3}{4}$ " x 3" strip of blue cardstock which has a white core, and place it the Scor-Pal. I place the left edge of the paper at the 4" mark and score at $4\frac{3}{4}$ " and 9". (This is actually a $\frac{3}{4}$ " and 5" mark if measured from the left side).
2. Rotate the card so the right top corner and the left bottom corner are sharing the same line and score. Repeat the score marks every $\frac{1}{2}$ " until the card is covered with angled marks.
3. Rotate the card so that now the top left edge and the bottom right edge meet on the same line and repeat scoring as in step 2. When finished you should have diamonds covering the front of your card.

4. To distress the paper, take a nail file and sand the top of the surface so that the white starts to show through.

5. Fold along the original score marks made in step 1, creating a matchbook.

6. Stamp cupcake onto white and silver cardstock with Palette Noir ink.
7. Cut out only the wrapper portion from the silver cupcake.
8. Score along markings with the embossing stylus and adhere to the bottom portion of the white card.
9. Apply glitter glue along the icing and set aside to dry.
10. Stamp cherry and flower, color with pencils and cut out.
11. Apply Crystal Lacquer to the cherry and set aside to dry.
12. Cut a green square and layer onto a slightly larger white square. Adhere this to the front flap of matchbook cover. Adhere the cupcake to center of the square with pop dots.
13. Stamp saying onto green strip and adhere to slightly larger white strip. Trim the edges with decorative scissors, and adhere to bottom flap.
14. Adhere the flower with pop dots to lower flap as shown, and glue the cherry onto the icing as shown.
